OBJECTIVE

Technical professional with software development, systems integration, project management, and client-support experience. Builds and supports software platforms, connects business systems, improves delivery workflows, and translates operational needs into practical technical solutions.

EXPERIENCE

Manager

May 2020–Present

DSTax Technologies

Warrenville, IL

Manager serving as a technical lead and lead developer for a tax-integration platform, with responsibilities spanning integration development, project coordination, client support, troubleshooting, implementation assistance, and documentation.

- Served as Lead Developer and Project Manager.
 - Managed internal development projects and client-coordinated work, sharing integration updates, reporting status, and responding to questions and requests.
 - Supported end-to-end integration implementations, including requirements gathering, setup, troubleshooting, and go-live support.
- Develop integrations between financial platforms and tax providers.
 - Supported integrations with Acumatica, Chargebee, Sage Intacct, WooCommerce, Magento/Adobe Commerce, Thomson Reuters, Vertex, Sovos, and SureTax.
- Led the transition from Version 1 to Version 2 of the tax-integration platform.
 - Broadened tax-provider and financial-platform support.
 - Improved UI/UX.
 - Optimized asynchronous operations to improve performance and throughput.
 - Migrated production workloads from DigitalOcean to AWS.
- Created and maintained client guides and knowledge-base articles.

Warehouse Associate

Jun 2019–May 2020

Colectivo Coffee Roasters

Milwaukee, WI

- Fulfilled orders for more than 1000 restaurant and store clients.
- Updated invoices for inventory changes to help maintain accurate records.
- Partnered with the IT department to install and troubleshoot new point-of-sale nodes.

Facilities Management Intern

May 2016–Dec 2018

Komatsu Mining Corp. (Joy Global)

Milwaukee, WI

- Analyzed asset and facilities databases, identifying more than \$10 million in previously unidentified asset value that informed the sale of unused assets before Komatsu's acquisition of Joy Global.
- Evaluated, selected, and implemented a global mapping platform that provided facility information to employees and customers.
- Initiated web automations that reduced manual database-maintenance work.
- Managed SharePoint sites and data and designed data-input forms to improve accessibility, reduce errors, and promote cross-department information sharing.
